Room and desk partition for your home office
BuzziTripl Home family was specifically designed with compact homes and the new ways of working in mind. Create a small, temporary office for focused work with BuzziTripl Home Low and use BuzziTripl Home High as a screen to hide any visual clutter that may appear in the background during video meetings, as well as a room divider and kid's playroom. Both are so light and flat, that you can easily pick them up, move them around and store them under the bed or in a cupboard. From now on you'll be able to concentrate and create separate spaces with these bicolor (off white/anthracite), compact and tack-able solutions. They're are made of 3 layers of felt with Velcro strips.

Design by BuzziSpace Studio
