Technical Components

Light source

The Light source is wrapped with an upholstered ring in the same fabric as the foam shade. The PMMA diffusor ensures an optimal light spread and efficiency. It creates a very diffuse light surface without any dottiness. The light source of the BuzziJet Standing is a LED PCB, containing 36 low power LED's.

350 Lux

All in details

As final touch the fabric cable is intentionally pushed into the curved shape frame, hiding all the screws and connections. Select a red fabric power cable to create a detail that stands out or choose a black one to create an elegant layout.

Dimming

You can choose from a more energized or intimate atmosphere by dimming the light and relax.
