Back to Office Solutions (B2O)

Back to Office Solutions

Now more than ever, the workplace needs to support people's wellbeing, knowing that their safety is directly linked to their physical, cognitive and emotional states. As we work with our global network of leading organizations and experts, we recognize the importance of looking at the return to work across the time horizons of now, near and far.

An essential part of planning for the *Now* phase, means retrofitting the workplace, based on a commonsense approach that adheres to governmental and global health guidelines, including physical distancing, adding barriers, cleaning and safety measures.

The addition of Back to Office Solutions (B2O) to existing spaces is especially important to create new divisions when the minimum required distance between employees cannot be achieved. Companies need to be able to adapt their existing spaces now, with short term solutions that require minimum investment, to let people come back safely to the office.

[Back to Office Solutions](#)

Retrofitting Shields

Leverage existing space division screens on desks and benches. Light and easy to install, the retrofitting extensions provide an immediate and low-investment solution for additional protection at the workstation.

Desk Shields

Desk Shields are easy to integrate in existing workstations and provide the desired level of protection with different applications.

Freestanding Shields

Movable and easy to clean, the Freestanding Shields provide structure to any environment while supporting the protection of personal space.

Accessories

Small details can make a great difference. Accessories and storage allow employees and visitors to access personal protection equipment such as face masks, gloves or sanitizers. Safety instructions and name tags allow individuals to share a space while respecting hygiene protocols.

Retrofitting Shields

**Dimensions: W1400/1600/1800 mm, H407 mm,
D2 mm (Polycarbonate)**

Retrofitting Shields are polycarbonate extensions that can be easily integrated on existing screens. Polycarbonate allows for full visibility.

Compatibility

Compatible with any screen or rail solutions with a thickness range between 23 mm (minimum) and 35 mm (maximum).

Compatible with Divisio and Partito Screens.

No assembly required.

86€ List Price per workstation

100% visibility + division

Model codes polycarbonate:

XRTRFIT1400

XRTRFIT1600

XRTRFIT1800

Modular Shields

**Dimensions: W1000 mm, H807 mm, D4 mm
(Polycarbonate)**

Modular Shields are protective polycarbonate separations that can be easily integrated frontally and laterally in existing desk and bench workstations. Polycarbonate allows for full visibility and it is easy to clean.

Compatibility

Before installing the screen on the desk surface, it is recommended to remove all additional elements on the desk such as power outlets, lights and monitor arms. They can be reinstalled or simply moved on the empty side of the desk. In the recommended Z configuration on benches (see first application on the right) one side of the desk remains free to place additional elements.

The shields are compatible with pre-installed Divisio and Partito Screens.

XMODS1000

100% visibility + division

Counter Shields

**Dimensions: W800/1000/1200/1400 mm, H800 mm,
D2 mm**

Counter Shields are protective polycarbonate screens that can be easily placed on tables, desks and counters. The cut-out supports safe customer-facing interactions. Transparent polycarbonate allows for full visibility, is light, easy to move and clean. Counter shields with fixation provide stability, while counter shields without fixation allow for an easy reconfiguration, with no assembly required.

Compatibility

Counter Shields with fixation is compatible with desk top thicknesses between 25mm and 35mm.

Model codes (with fixation):

X5SP2105241
X5SP2105242
X5SP2105243
X5SP2105244

Model codes (without fixation):

X5SP2105205
X5SP2105206
X5SP2105207
X5SP2105208

Pop-Up Shields

Dimensions: W1000/1200/1400 mm, H600 mm

Pop-Up Shields are polycarbonate on-desk freestanding separations. Lateral screens can be easily installed onto desks, benches and meeting room tables. The Frontal version can be placed anywhere on the desk top and easily moved.

Model code lateral polycarbonate:
XFRSLAT1000

Model codes frontal polycarbonate:
XFRSF1200
XFRSF1400

Partito Protective

Dimensions: W900/1200 mm, H1887 mm

Partito Protective is a selection of freestanding screens that bring structure to any environment while encouraging people to keep a safe social distance. These screens suit healthcare environments, as well as offices and retail businesses, or any space where physical separation is needed. They are made from polycarbonate, which makes them easy to clean, effortless to move and durable.

Screens and Legs to be ordered separately.

Additional materials available upon request.

Model codes:
XCW92W116330
XCW92W116344

Legs:
XCW93W121228

Model codes:
XCW92W116341
XCW92W116345

Legs:
XCW93W121228

Note: It is necessary to always order two model codes per screen: one model code for the screen depending on the preferred dimension + one model code for the legs.

Unframed Shields

Dimensions: W1000 mm, H1500 mm, D2 mm

Unframed Shields are protective polycarbonate screens sustained by a metal base. The bent design allows for extra stability. They are made from polycarbonate, which makes them easy to clean and durable.

*Steelcase standard metal paints can be requested.
Conditions apply.*

Model code:
X5SP2105238

IPE Dispensers

Dimensions Recycling Dispenser: W350 mm, H1000 mm
Dimensions Display Dispenser: W380 mm, H850 mm

IPE Dispensers are metal freestanding structures to store and make Individual Protection Equipment available in the office and other environments. They allow employees and visitors to have immediate access to protection accessories such as masks, gloves, sanitizer and tissues. The Recycling version provides supply storage and a recycle bin, while the Display Dispenser provides a space-holder for safety instructions and other informative posters.

*Steelcase standard metal paints can be requested.
Conditions apply.*
