

FABRICIUS. Design: Preben Fabricius.

As a genuine classic, Fabricius tells the story of furniture. The Conversation Chair from the seventies combines the tradition of Scandinavian design and functional aesthetics with the charm of casual seating comfort. Precise in the processing of metal, top quality in the surfaces: armrest and supporting structure frame the slide-in seat. The result is lightness and a slim-line shape. Whether as a soloist or an ensemble, it was made for lounges, lobbies and living rooms. And of course for design museums.

Product description

Armchair and sofa

Modell no.

710
