

terminal

soft seating

KUSCH+CO

This series comes in many variations, opening up a whole gamut of varied configuration options, ranging from stand-alone units and row configurations to individual architectural interior design concepts. A new generation of benches, designed to reduce the amount of eye contact, and to make everyone feel less observed and therefore more at ease. Ideally suited for shopping areas in airports and malls, for foyers, hotels or reception, recreation and waiting areas.

Design by Prof. Jørgen Kastholm, Eichinger & Loidolt

As many as three designers were the creative minds behind this series, geared towards highly frequented upmarket contract environments. This series was designed in close co-operation between Prof. Jørgen Kastholm and the designer duo Loidolt & Eichinger. A joint effort fulfilling all the set requirement specifications.

Variations

Terminal sofa with central back

The benches with central back come in three different designs. Available in the shape of clear-cut rectangular, a well-balanced ellipse and not forgetting the oval shaped benches.

Rectangle

Ellipse

Long oval

Terminal sofa with central back

TERMINAL SOFA RC UPH

Ellipse

TERMINAL SOFA EL UPH

Long oval

TERMINAL SOFA RCR UPH

Terminal sofa with central back

Accessories

- Plastic glides
- Plastic glides nonskid

Materials

Terminal

Upholstery

- Standard foam
- Optional available with upholstery with flame retardant foam resp. with flame retardant foam and fireproof fabric

Frame

- Aluminium legs powder coated or polished
- Stretcher bar powder coated, made of rectangular steel tubes

Fire Prevention, quality, sustainability

Excerpt

Fire Prevention

Depending on the environment, contract seating has to be able to fulfil very specific requirements. Interior designers and planners sometimes have to clear difficult hurdles: such as exacting fire prevention regulations. Kusch+Co has worked out individual solutions:

Upholstery

The upholstery is optionally available with flame retardant foam. In addition, it is available with the Kusch+Co Fire Prevention Concept, consisting of a special fabric “flamline” (approved by the building authorities and A2 nonflammable according to DIN 4102) between the upholstery foam and the fabric.

This concept achieves four life-saving objectives. The seating:

- is self-extinguishing,
- reduces the smoke development,
- prevents an incipient fire from spreading out,
- does not turn into an additional ignition source.

Test reports in compliance with national and international standards document the laboratory fire tests conducted on different series finished with a wide variety of materials.

With regard to the upholstery, e.g. with leather, artificial leather as well as many textile fabrics, or to our unupholstered variations featuring a plywood, laminated or plastic seat shell, most of our series meet the following standards:

- Germany: DIN 66084 P-a
- France: NF D 60-013
- Great Britain: BS 5852 Crib 5
- Italy: UNI 9176
- Europe: EN 1021 part 1/2

On request, we happily make the test reports available to you – please contact us.

Please contact us to receive further information.

Quality

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001:2015 and to DIN EN ISO 9001:2015. External audits as well as our in-house laboratory safeguard our quality level.

All variations of series Terminal meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we test most of our contract seating with higher loads and cycles. On request, we conduct individual tests acc. to the customer's specifications.

We are certified in compliance with DIN EN ISO 9001:2015. In our own laboratory, we test our products before their market launch whether they comply with the normative requirements applicable to contract seating, task chairs, and tables, and issue a Declaration of Conformity.

We happily make these Declarations of Conformity as well as our brochure “Mission Statement Quality” providing detailed information on our test procedures available to you – please contact us.

Sustainability

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.
