Design by Jorge Pensi

He studied architecture in his home town of Buenos Aires. Since 1977, he lives in Barcelona and made a name for himself with his aluminium furniture designs. He used to be a visiting lecturer at the Art College in Stuttgart. His designs can be admired at many international exhibitions. The long list of design prizes underlines the importance of his works as a designer. Jorge Pensi's trademark style is reflected in his series for Kusch+Co.

Variations

Yara chair on wooden frame

The entirely upholstered seat shell, available with a backrest in two different heights, appears to be floating on the slender stacking wooden frame. The upholstery is slender and comfortable and therefore cozy and snug.

Yara chair on wooden frame with armrests

The armrests, which arch outwards, welcome everyone with open arms. Thanks to the ingenious design, both armrests and frame look exceptionally slender. The stacking chair with armrests comes with either a normal or high backrest.

Product data

Yara chair on wooden frame

Accessories

- Plastic glides
- Plastic glides with felt
- Metal glides
- Protect glides

Weight: 6.5 – 7.0 kg depending on model

Weight: 7.0 – 7.5 kg depending on model

Stackability

- Stackable on dolly CART KU 1: 5 units
- Stackable on dolly CART KU 3: 5 units
- Stackable on dolly CART KU 2: 5 units
- Stack of 4 units recommended
- Height plus 9 cm per stacking chair
- Depth plus 6 cm per stacking chair

¹ The DIN seat height was determined acc. to DIN EN 1335-1, i.e. the seat height measured by means of a measuring device at the position of the ischial tuberosity (sitting bones) after having placed a load of 50 kg on the half width of the seat.

² high backrest

Accessories

- Plastic glides
- Plastic glides with felt
- Metal glides
- Protect glides

Weight: 7.5 – 8.0 kg depending on model

Weight: 8.0 – 8.5 kg depending on model

Stackability

- Stackable on dolly CART KU 1: 5 units
- Stackable on dolly CART KU 3: 5 units
- Stackable on dolly CART KU 2: 5 units
- Stack of 4 units recommended
- Height plus 9 cm per stacking chair with armrests
- Depth plus 6 cm per stacking chair with armrests

Materials

Yara

Frame, armrests

- Natural beech or stained
- Optional with antibacterial surface coating

Seat and backrest

- Entirely upholstered
- Standard foam
- Optional available with upholstery with flame retardant foam resp. with flame retardant foam and fireproof fabric

Fire Prevention

Excerpt

Fire Prevention

Depending on the environment, contract seating has to be able to fulfil very specific requirements. Interior designers and planners sometimes have to clear difficult hurdles: such as exacting fire prevention regulations. Kusch+Co has worked out individual solutions:

Wooden parts

As standard, wooden parts are protected by a UV curing, environmentally harmless, water-based lacquer meeting all the requirements of “low flammability” acc. to DIN EN 13501 B s2 d0.

Upholstery

The upholstery is optionally available with flame retardant foam. In addition, it is available with the Kusch+Co Fire Prevention Concept, consisting of a special fabric “flamline” (approved by the building authorities and A2 nonflammable according to DIN 4102) between the upholstery foam and the fabric.

This concept achieves four life-saving objectives. The seating:

- is self-extinguishing,
- reduces the smoke development,
- prevents an incipient fire from spreading out,
- does not turn into an additional ignition source.

Test reports in compliance with national and international standards document the laboratory fire tests conducted on different series finished with a wide variety of materials.

With regard to the upholstery, e.g. with leather, artificial leather as well as many textile fabrics, or to our unupholstered variations featuring a plywood, laminated or plastic seat shell, most of our series meet the following standards:

- Germany: DIN 66084 P-a
- France: NF D 60-013
- Great Britain: BS 5852 Crib 5
- Italy: UNI 9176
- Europe: EN 1021 part 1/2

Please contact us if you wish to receive the test reports.

Quality, sustainability

Excerpt

Quality

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001:2015 and to DIN EN ISO 9001:2015. External audits as well as our in-house laboratory safeguard our quality level.

All variations of series Yara meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we test most of our contract seating with higher loads and cycles. On request, we conduct individual tests acc. to the customer's specifications.

We are certified in compliance with DIN EN ISO 9001:2015. In our own laboratory, we test our products before their market launch whether they comply with the normative requirements applicable to contract seating, task chairs, and tables, and issue a Declaration of Conformity.

We happily make these Declarations of Conformity as well as our brochure "Mission Statement Quality" providing detailed information on our test procedures available to you – please contact us.

Sustainability

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.
