

¡hola!

KUSCH+CO

The all-rounder among the multi-purpose chairs. Ideally suited for a plethora of environments, ranging from foyers and canteens to conference and seminar rooms, not forgetting large assembly halls. The dynamically shaped back is strongly reminiscent of a sail. The fresh colours, which can be mixed and matched for the seat and backrest, add vitality to any room. The armrests are in the same colour as the backrest or the seat. Highest level of functionality paired with elegance! Especially the variations featuring wooden legs ooze a cosy, homelike flair.

Design by Jorge Pensi

He studied architecture in his home town of Buenos Aires. Since 1977, he lives in Barcelona and made a name for himself with his aluminium furniture designs. He used to be a visiting lecturer at the Art College in Stuttgart. His designs can be admired at many international exhibitions. The long list of design prizes underlines the importance of his works as a designer. Jorge Pensi's trademark style is reflected in his series for Kusch+Co.

Variations

¡Hola! chair, metal legs

Either with or without armrests, upholstered or unupholstered – the ergonomically shaped seat and back part invite everyone to take a seat. Available in a firework of 11 distinct colours for the seat, backrest and armrests. Not forgetting the Black Edition, featuring black plastic parts as well as a frame that is either jet black textured powder-coated (BL RAL 9005) or finished in upmarket dark chrome. There is also a model for outdoor use.

¡Hola! hocker

The hocker is the taller version of the chair, without compromising on stackability. The footrest helps to give a firm support. The seat and the backrest are also available in 11 distinct colours.

¡Hola! bench

Either space-saving in a waiting room or visually prominent in a foyer: the bench frame is capable of carrying several seats and backs that are solidly fitted on the stable stretcher bar. A rectangular bench top can be added for more storage space. When placed between two seats, the bench tops provide sufficient distance to the persons seated next to one.

¡Hola! chair, wooden legs

The stability of steel combined with the charm of natural wood. The clou: the legs are made of chrome-plated steel, however covered with a real-wood "sleeve", featuring an exquisite, diagonally running wood grain. Finish in natural beech, optionally stained beech or in natural oak.

¡Hola! chair, metal legs, hygienic version

Easy to clean and safe to disinfect! These variations are constructed to reduce the germ transmission risk to other persons, e.g. through antibacterially coated plastic parts, a hygiene-efficient stacking plate, and either bright chrome-plated or antibacterially powder-coated legs.

Hygiene-oriented stacking plate

¡Hola! bench, hygienic version

In rooms where people sit close together, hygiene become all the more important. Thanks to its excellent cleaning and safe disinfection properties, these benches are ideally suited for waiting areas in medical practices, health-care facilities and public buildings. They feature antibacterially coated plastic parts, bright chrome legs, or antibacterially powder-coated legs and stretcher bar.

Materials

¡Hola!

Seat, back, armrests

- Plastic polypropylene signal white, silk, quartz grey, light grey, black grey, black, midnight blue, pimento, scampolo, tinkerbelle and salem (suited for indoor and outdoor use, colours can be combined as desired, armrests are in the same colour as the backrest or seat)

Upholstery

- Optional with upholstered seat pad or upholstered seat/backrest pad,
- Standard foam
- Optional available with upholstery with flame retardant foam resp. with flame retardant foam and fireproof fabric

Metal frame

- Frame powder-coated, powder-coated with antibacterial surface coating, chromed, dark chromed or satin chromed steel (chair)
- Frame and footrest chromed, satin chromed or powder-coated jet black (RAL 9005) (hocker)
- Legs powder-coated, chromed or satin chromed steel, beam powder-coated (bench)

Wooden legs

- Natural beech or stained
- Natural oak

Tops

- Rectangular bench top full core material HPL black, HPL Resopal finish Traceless TP black, low flammability, thickness 13 mm, black edges, support powder-coated

Variations kuschmed® Hygienic-Line

- Frame/legs chromed or powder-coated with antibacterial surface coating (chair, bench)
- Beam powder-coated with antibacterial surface coating (bench)
- Plastic armrests/seat/backrest with antibacterial coating (colours can be combined as desired, armrests are in the same colour as the backrest or seat)
- Hygiene-oriented stacking plate

All colour recommendations are only approximate to the original colour tone. It is impossible to guarantee a perfect colour match.

Outdoor use

The variation HOLA FRAME CHAIR 4L OD P is suited for a temporary outdoor use up to a certain degree. The mechanical properties of the plastic components are not impaired by the weather conditions. However, discoloura-

tion and irreversible soiling of the plastic components is inevitable, and therefore no grounds for complaint. The outdoor use of these products in extreme weather conditions (i.e. tropics, persisting frost, and expo-

sure to extreme UV radiation or constant temperatures $> 40^{\circ}\text{C}$) is not possible, and should be limited dependent on the seasons.

Solutions

Excerpt

Depending on the environment, contract seating has to be able to fulfil very specific requirements. Interior designers and planners sometimes have to clear difficult hurdles: such as exacting fire prevention or hygiene regulations, or taking the needs and wishes of persons with reduced mobility into consideration. Kusch+Co has worked out individual solutions:

Fire Prevention

Plastic

The plastic parts of this seating series meet the requirements of the fire prevention standards DIN EN 1021 part 2.

Wooden parts

As standard, wooden parts are protected by a UV curing, environmentally harmless, water-based lacquer meeting all the requirements of "low flammability" acc. to DIN EN 13501 B s2 d0.

Upholstery

The upholstery is optionally available with flame retardant foam. In addition, it is available with the Kusch+Co Fire Prevention Concept, consisting of a special fabric "flamline" (approved by the building authorities and A2 nonflammable according to DIN 4102) between the upholstery foam and the fabric.

This concept achieves four life-saving objectives. The seating:

- is self-extinguishing,
- reduces the smoke development,
- prevents an incipient fire from spreading out,
- does not turn into an additional ignition source.

Test reports in compliance with national and international standards document the laboratory fire tests conducted on different series finished with a wide variety of materials.

With regard to the upholstery, e.g. with leather, artificial leather as well as many textile fabrics, or to our unupholstered variations featuring a plywood, laminated or plastic seat shell, most of our series meet the following standards:

- Germany: DIN 66084 P-a
- France: NF D 60-013
- Great Britain: BS 5852 Crib 5
- Italy: UNI 9176
- Europe: EN 1021 part 1/2

Bench tops

Tops made of HPL full core material are flame retardant conform DIN EN 13501 B s1 d2.

Please contact us if you wish to receive the test reports.

Hygiene

Products from the kuschmed® Hygienic-Line provide an unfavourable breeding ground for bacteria, germs, and mildew. For this purpose, this range is conceived without open-pored veneers, slits in the backrest, improper upholstery, finger traps, open frames, felt glides, or materials that degrade upon contact with disinfectants.

Only fabrics with specific properties, e.g. hygienically impervious fabrics as well as water- and dirt-repellent finishes, qualify for this product line. Fabrics made of nano-coated fibres as well as disinfectant-compatible fabrics are also used.

The surfaces have to be smooth and pore-free, impervious to liquids and germs, and growth-inhibiting for bacteria. All wooden surfaces are entirely sealed with a special high-density, pore-free and disinfectant-resistant lacquer with antibacterial properties. Metal surfaces are sealed with a chrome finish or with a silver-bearing, anti-bacterial powder coating. The

silver ions within the coating are activated upon contact with bacterial colonies, diffusing at the surface, denaturing the cell walls of the bacteria, and thus inhibiting their growth.

kuschmed®
HYGIENIC-LINE

Reduced Mobility

Many people experience mobility difficulties, among them are senior citizens, pregnant women, persons of short stature, as well as persons with an individual disability. Sitting can be quite a hurdle, as they may have difficulties in taking a seat or getting up from normal seating. In this case, the standard seat height of 42 or 45 cm is usually too low.

Seating has to fulfil the following requirements for persons with reduced mobility:

- Seat height of at least 48 cm
- Seat surfaces enabling them to sit upright and to get up more easily
- Stable arms providing good support
- The legs should be positioned as vertically as possible, so that they don't become a tripping hazard

Next to the standard seat height of 45 cm, all variations of the chair with metal legs (not for models suited for outdoor use) of the series ¡Hola! are available with an optional seat height of 50 cm. On top of this, they feature stable armrests and nearly perpendicular legs, and enable an upright posture.

Please contact us to receive further information.

Quality, sustainability

Excerpt

Quality

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001:2015 and to DIN EN ISO 9001:2015. External audits as well as our in-house laboratory safeguard our quality level.

All variations of series ¡Hola! meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we test most of our contract seating with higher loads and cycles. On request, we conduct individual tests acc. to the customer's specifications.

We are certified in compliance with DIN EN ISO 9001:2015. In our own laboratory, we test our products before their market launch whether they comply with the normative requirements applicable to contract seating, task chairs, and tables, and issue a Declaration of Conformity.

We happily make these Declarations of Conformity as well as our brochure "Mission Statement Quality" providing detailed information on our test procedures available to you – please contact us.

Sustainability

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.
