

## POINT

Point displays a shape that is strong and full of character with many combination options. The furniture can be reduced or expanded. It also changes character depending on the armrests that are selected. Built-in power socket available as optional extra. Point is also available as a bench system with the characteristic bench armrest. The bench is deep enough to sit on both sides and works very well on its own or as a long dynamic shape that winds its way through a room.
