

## **ARRAY**

The Array clothes rack has strong global appeal and is ideal in almost all interiors. The name Array means to put in order, organise and it underlines practical usefulness. Array is available both as a floor and a wall model. A unique spring-loaded design makes the clothes rack both stackable and foldable, easy to store away and retrieve when required. Easy to handle without using any tools. It is made of die-cast aluminium, plastic and steel tubing.
