

MONOLITE COMPARTMENT

Monolite compartment with high backs and compartment wall works like a room within a room and provides natural screening and sound damping. With less seating depth and greater height it offers a more upright position, suitable in staff dining rooms and coffee rooms. The gap between the seat and back makes it easy to clean. Removable covers are optionally available. Monolite can be assembled into different formations and made to measure by request. Benches, easy chairs and sofas with low/high backs and tables complete the range.
