

Hooks

Backpack rack

Design — Iiro Viljanen

Hooks is a stylish and durable solution with a clear-lined design for storing backpacks in learning environments. The backpack rack will not fall over even if the backpacks are distributed unevenly, and the hooks can hold a lot of weight. Thanks to its compact dimensions, the Hooks backpack rack fits in small spaces and can also be used as a space divider. Hooks is easy to move around with the castors that are available as accessories.
